## Education

| **Middle East Technical University** | **2020 − Ongoing** |
|---|---|
| *Bachelor of Science in Electrical and Electronics Engineering [CGPA: 3.52/4]* | *Ankara, Turkey* |
| *English Preparatory School* | *2019 − 2020* |
| **Antalya Anatolian High School** | **2015 − 2019** |
| *Science and Math Division [92.5/100]* | *Antalya, Turkey* |

## Publications

**Conference Paper**        **2023**

**Akman, A.**,Kilic, O. S., & Alatan, A. A. (2023). *MAEVI: Motion Aware Event-Based Video Frame Interpolation.* *ArXiv*
Submitted to ICIP 2023.

**Conference Paper**        **2022**

Kilic, O. S., **Akman, A.**, & Alatan, A. A. (2022). *E-VFIA: Event-Based Video Frame Interpolation with Attention.* *ArXiv*
Presented in-person at ICRA 2023.

## Experience

**METU OGAM (Center for Image Analysis)**        **February 2022 − Ongoing**

*Undergraduate Researcher*        *Ankara, Turkey*

- Have been working on event-based vision and neuromorphic algorithms under the supervision of Prof.Dr.Aydın Alatan

**ESEN System Integration**        **July 2022 − August 2022**

*Intern*        *Ankara, Turkey*

- Worked on development of deep-learning based EO-EO, EO-IR image registration system.
- Implemented 5 state-of-the-art paper in Python and PyTorch and tested them with airborne-spaceborne data.

**DrSistem Virtual Health Consultancy Program**        **July 2019 − September 2019**

*Volunteer Summer Intern*        *Antalya, Turkey*

- Used computer vision and trained deep learning models to segmentate radiological data.
- Trained a neural network to detect symptoms of parkinson on hand drawings of users.
- Helped the development of the online virtual consultancy program.

**Simple Robotics and Electronics**        **June 2017 − October 2017**

*Volunteer Summer Intern*        *Antalya, Turkey*

- Developed various IOT applications using Arduino and Raspberry Pi platforms.
- Developed small competitive mini sumo-line follower robots.
- Gained 3D printing , pcb design and prototyping experience.

## Honors and Awards

**First Place** | *First Place, METU Aerospace Engineering Department-Boeing*        **November 2021**

- As METU Göksat Space Team we have taken first place in the METU VTOL competition sponsored by Boeing. The objective was to design-build and fly a VTOL aircraft to accomplish various payload missions.

**Second Place and Best Presentation** | *Havelsan-T3 Foundation*        **September 2021**

- As METU GÖKSAT Space Team, we have taken the second place and the best presentation award amongst 112 teams in the Swarm UAV competition held by Havelsan in the scope of 2021 Teknofest technology competitions. Teams were expected to demonstrate developed swarm systems' robustness using multiple quadcopters (Crazyflies) indoor.

**Third Place** | *Pixery Hackathon IEEE METU*        **January 2020**

- Our team has taken the third place in 48 hours Pixery Hackathon IEEE METU. Our project aims to help visually impaired people for walking. We used computer vision , machine learning and android technologies to construct our prototype.

**First Place** | *Akdeniz University* **May 2019**
- The research project about real-time artificial intelligence process on UAV. The project won the first place in the technology category in the Akdeniz University Prof.Dr.Fuat Sezgin 3rd Inter-High School Mathematics and Science Project Competition.

**Second Place** | *TUBİTAK* **March 2018**
- The research project won the second place in the coding category in the TUBITAK Inter-High School Research Projects Competition. Project name: Developing Cube Satellites on Femto Class Intended Fundamental Space Research.

**First Place** | *National Ministy of Education-TUBİTAK* **May 2017**
- 11. International MEB Robotics Competition in Design and Run (like Hackathon) Category

## Leadership / Extracurricular

**METU Göksat Space Team** **January 2020 – November 2021**
*Team Leader* *Techical Student Team*
- Leader of METU Göksat Space Team which attend national and international aerospace-based student competitions. Responsible for organization and running of the four different subteam which are electronics/software , organization/sponsorship , mechanical , aerospace and integration subteams.
- Electronics/Software Subsystem Designer. Designed electrical subsystem of a mini UAV. Designed electronics and PCB's for avionics of three different model satellites. Developed embedded software for model satellites. Taken responsibility for the simulation of the swarm drones.
- In 2021 the team has attended four competitions which are (Teknofest) Model Satellite competition organized by Turksat , (Teknofest) International UAV competition organized by Tubitak and Turkish Aerospace [got 5th place amongst 269 competitors] , (Teknofest) Swarm UAV competition organized by Havelsan and VTOL UAV competition organized by METU AEE Department in cooperation with Boeing.
- In 2020 the team attended (Teknofest) Model Satellite competition organized by Turksat and International CANSAT (Model/Can-Sized Satellite) competition organized by AAS supported by NASA.

**Antalya Anatolian High School Physics Society** **October 2016 – June 2018**
*Science Club Co-President*
- Was co-president of the Physics society for two years.
- Organized various events such as sky observation nights, conferences, Pi days, science fair experiments.
- Established society room and robotics division.

## Technical Skills

**Languages**: Python, MATLAB, C
**Technologies/Frameworks**: OpenCV, PyTorch, Git, Intel lava, EAGLE (PCB design), WordPress , HTML/CSS

## Interests

Turkish Classical Music (Soloist at ODTÜ KTMT), Astronomy, Motorsports, Football
